1 Introduction

1.1 Scope of this Document

This deliverable contains the web portal (internal and external) release.

2 Specific objectives

The goals of the project web portal are:

- Getting the project known by the elderly care community and decision makers (external website)
- Internal project management and work progress (internal forum)

3 Methodology

Both tools are “alive”: website and intranet are released at the beginning of the project, being updated regularly by UoPEL and CETEMMSA, with the support from the whole consortium.

4 Executive summary

This deliverable contains the short description of contents and methodology for

- Our external website
- Our internal forum

5 Project internal web portal

Access: <http://ecaalyx.org/members/>

The internal portal includes key functions for the project management and work progress, such as:

- thematic forums
- mailing lists for communication exchange and cooperative work
- documents and reports uploading, sharing and discussion of successive versions
- private document repository
- communication platform that can also preserve the 'Consortium's memory' on the long run for later reference, unlike e-mails
- advanced polls/voting functionality
- etc...

Europe is facing major socio-demographic changes. The ratio of elderly people to the entire population is constantly growing, while the corresponding ratios of younger age groups, especially the working population, are decreasing. Furthermore, ageing combined with an increasing burden of chronic, concurrent diseases threatens to make the current models of healthcare unsustainable. Ambient Assisted Living

Newsflash

Telehealth is enhancing the quality of life for patients and offers a cost-effective model of care for the management of long-term conditions, according to a panel of leading UK healthcare and local government professionals. [Read more...](#)
