1. Integration website and business plan..... 1

## **1. Integration website and business plan**

Based on the deliverable D 8.10 Business cases for UAS-AAPS, EDS & EDN (social business case ROSETTA) and based on agreements between the most important commercial partners in the project and project coordinator TNO in the end-stage of the project a page has been added to the website [www.aal-rosetta.eu](http://www.aal-rosetta.eu) (July 2012). For each language (English, Dutch, German and Italian) slightly different versions have been made.

The general principle of the business plan is: in each country a system integrator based in that country brings the ROSETTA system to the market:

- For the Netherlands: Avics
- Germany: CIBEK
- Italy: I+
- In Belgium a system integrator still has to be found.

The webpage for each country gives a brief summary of the outcomes of deliverable 8.10 - the social business case for the different parts of the ROSETTA-system.

In each language/country page the company (system integrator) in that country is mentioned as contact address for that country.
