1. Knowledge transfer to the field of longterm care

Under deliverable D 8.4 a second version of the website www.aal-rosetta.eu has made (from first half of 2012 onwards) especially aimed at the care organisations of the long term care. Versions in four languages have been made.

In the Netherlands there is a separate page on the ROSETTA-project under the Dutch website www.domoticawonenzorg.nl :
<http://www.domoticawonenzorg.nl/smartsite.dws?id=134583>.

This is on line from 2009 onwards.

In June 2012 a film of ten minutes has been made about the functionalities of the ROSETTA-system with a Dutch voice over and English subtitles and placed on different websites (from July 2012 onwards):

- www.aal-rosetta.eu,
- www.domoticawonenzorg.nl (special Vilans-website),
- www.vilans.nl (general Vilans-website).

This film was made possible in cooperation with the Dutch Alzheimer Association.

Under the deliverable D 8.9 workshops for stakeholders in the Netherlands, Belgium, Germany and Italy were organized in the period of 2011 – 2012. The participants were mainly organisations for the long term care.

Especially in the last year of the ROSETTA-project as an AAL-project a number of presentations were given in congresses etc for the long term care in The Netherlands and Belgium (not specific scientific congresses).

There were also presentations in scientific congresses. Amongst others on a specific scientific congress on the subject dementia.

In May 2012 the book ‘‘Zorgdomotica’’ was published (Redaction Joost van Hoof, Eveline J.M Wouters, Fontys University Of Applied Sciences). It contains a separate chapter on the ROSETTA-system. One of the target groups of the book are the professionals in the care.

A publication is foreseen in the Dutch magazine ‘‘Denkbeeld’’. This is not scientific, but has as main target group the professional caregivers in the Dutch dementia care.
