The SENIOR-TV Platform

The project aims at developing a platform of formal and informal care-giving services for older adults, situating the elderly and, in particular, their well-being and happiness in the centre of the design.

Television is used as the main peripheral.

FORMAL CARE-GIVING SERVICES INCLUDE: Biophysical measures and parameters i.e. body weight, blood pressure, pulse rate, blood glucose level.

INFORMAL CARE-GIVING SERVICES INCLUDED: Weather, NEWS, Events, Wikipedia, YouTube & TV channels on rehabilitation, Memory and attention games.

The elderly will be able to navigate through the applications using an air mouse and a specially designed remote control.
