Executive Summary

This is the third and final AALuis Yearly Dissemination Report stating the dissemination activities, materials and results for the whole project period (including 3 months extension) of the AALuis project.

1.1 Main materials

During the first year of the project the first project dissemination materials were prepared aimed at starting up the project and to create general materials to share our vision and values. The two most important achievements were the launch of the project website (www.aaluis.eu) and the development of the general AALuis flyer.

The second year of the project was focused at expanding the dissemination activities with the created materials in the first year as strong base. Throughout the second year the materials were more specified in accordance with the development and finalization of the first prototypes.

The third year of the project was centred on the end user trials and the extension and refining of the prototypes. With the availability of the trial services it was easier to demonstrate and visualize the AALuis concept to the relevant stakeholders.

The consortium partners disseminated the progress and aim of the project proactively to the various target groups.

1.2 Main activities

During the three years AALuis was presented on several events aimed at a wide range of stakeholders. Some highlights are:

- AAL Forum 2013 (Norköpping) and 2014 (Bucharest)
- Workshop European Parliament, Brussels
- Verklizan Innovation Day 2013
- AAL Kongress 2014
- End-User Trials
- Lange Nacht der Forschung 2014
- Workshop Art and fun of User Interaction in AAL
- AAL2Business event
- TSA Conference 2013

1.3 **Main results**

To measure the results and use feedback to dissemination activities as input for business modelling and exploitation a structure was created to gather this information in a universal way using the “Dissemination evaluation form”.

2 About this Document

2.1 Role of the deliverable

The objective of this document is to present all partners' dissemination activities undertaken in the first two years of the project, corresponding to the period July 2011 to September 2014.

These activities include the development of several dissemination materials (leaflets, posters, bulletins and handouts, etc.), participation in and presentations at conferences and fairs, workshops, press conferences, presentations to companies, etc.

2.2 Relationship to other AALuis deliverables

The deliverable is related to the following AALuis deliverables:

<i>Deliv:</i>	<i>Relation</i>
D0.2	Periodic Report: in the periodic report for the CMU dissemination activities have to be reported as well. Thus there is an overlap between the two deliverables.
D7.2-A	Dissemination Plan: this document presents a plan of dissemination activities. The deliverable in hand is directly related to the deliverable since it reports all dissemination activities planned in the first 12 project months.
D7.2-B	Dissemination Plan: this document presents a plan of dissemination activities. The deliverable in hand is directly related to the deliverable since it reports all dissemination activities planned in the second 12 project months.

2.3 Structure of this document

The document is divided into two sections. In the first section the performed dissemination activities are listed and the second displays the dissemination evaluation feedback received.

3 Performed Dissemination Activities

The table on the following pages presents all performed dissemination activities and materials during the three years of the project. The table displays the date, partner involved, activity, location, material used, target groups, comments/feedback (if applicable) and a reference to further information on the specific dissemination activity.

Table 1: Dissemination activities

4 Dissemination Feedback

As written in the dissemination plan the evaluation of feedback received from dissemination activities/materials is of uttermost importance in relation to eventual business modelling and exploitation. This feedback gives an important insight in the perception and opinion regarding the AALuis vision, goals and project fundamentals.

To collect and save this valuable information a structure was created to gather this feedback in a universal way. In relation to this the “dissemination evaluation form” was developed. Evaluation forms can be used if during a dissemination activity input was received which is important to archive and share within the consortium. When feedback is received which will be covered in one of the deliverables it is not required to include this in a feedback form.

On the following pages the completed evaluation forms are presented.

4.1 AALuis Dissemination Evaluation Form – SSIC 2011

Activity name	Summit on Service Innovation in Cities (Booth & Presentation)
Partner(s) involved*	Verklizan
Date*	23 rd and 24 th of November, 2011
Location*/**	Eindhoven
Country*/**	Netherlands

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- Trade fair
- Seminar/Congress**
- Webinar
- Newsletter
- Workshop
- Demonstration
- Other:.....

2. Description of dissemination activity

- a) Distribution of flyers, answering questions.
- b) Explaining the added value of the AALuis approach to stakeholders

3. Stakeholders involved (multiple answers possible)

- End-user
- User organisations**
- Service providers
- (AAL)Developers
- Insurance companies
- Policy makers**
- Other(s):

4. Specific response to AALuis project (stakeholders, perception, business model)

Policy makers expressed appreciation specifically of the inclusiveness of the approach (overcoming boundary in reaching elder persons) in Service Innovation trajectories.

5. Other (valuable) comments

4.2 AALuis Dissemination Evaluation Form - Domotics Fair 2011

Activity name	Domotics Trade Fair NL (Booth & Presentation)
Partner(s) involved*	Verklizan
Date*	23 rd and 24 th of November, 2011
Location*/**	Eindhoven
Country*/**	Netherlands

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- o **Trade fair**
- o Seminar/Congress
- o Webinar
- o Newsletter
- o Workshop
- o Demonstration
- o Other:.....

2. Description of dissemination activity

- c) Distribution of flyers, answering questions.
- d) Explaining the added value of the AALuis layer to stakeholders (people had heard of AALuis via the Dutch Organisation of Health Research and Development).

3. Stakeholders involved (multiple answers possible)

- o **End-user**
- o **User organisations**
- o Service providers
- o **(AAL)Developers**
- o Insurance companies
- o Policy makers
- o Other(s):

4. Specific response to AALuis project (stakeholders, perception, business model)

Primary from *End-users* and *User Organisations* was the perceived great value of increasing 'Freedom of Choice' for the target group. (Said to be showing respect for them as responsible individuals, fitting also the new generation of older persons).

Spoken to two *developers*; who tended to focus on the business opportunities of the AALuis layer.

5. Other (valuable) comments

A company project leader suggested the linking of AAL / AALuis services to a current website facilitating combinations of formal and informal care.

4.3 AALuis Dissemination Evaluation Form – AAATE 2011

Activity name	11 th European AAATE conference (Paper, Presentation)
Partner(s) involved*	AIT
Date*	31/08-02/09/2011
Location*/**	Maastricht
Country*/**	The Netherlands

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- Trade fair
- Seminar/Congress/Conference**
- Webinar
- Newsletter
- Workshop
- Demonstration
- Other:.....

2. Description of dissemination activity

- Paper in conference proceedings
- Presentation of project idea in STS about user interfaces

3. Stakeholders involved (multiple answers possible)

- End-user
- User organisations**
- Service providers**
- (AAL)Developers**
- Insurance companies
- Policy makers
- Other(s):

4. Specific response to AALuis project (stakeholders, perception, business model)

The overall response to the ideas of AALuis was good. After the presentation there was time for an interesting discussion regarding some technical details. Some contacts to other research organisations and projects working on similar topics have been established (e.g. European Project GUIDE - Gentle User Interfaces for Elderly People)

5. Other (valuable) comments

Interest for future information and experience exchange.

4.4 AALuis Dissemination Evaluation Form – Care & ICT 2013

Activity name	Care & ICT Trade Fair NL (Booth & Flyers)
Partner(s) involved*	Verklizan
Date*	13 ^h - 15 th of March, 2013
Location*/**	Utrecht
Country*/**	Netherlands

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- Trade fair**
- Seminar/Congress
- Webinar
- Newsletter
- Workshop
- Demonstration
- Other:.....

2. Description of dissemination activity

- e) Desk with AALuis presentation and flyer
- f) Discussing the added value of the AALuis layer to stakeholders

3. Stakeholders involved (multiple answers possible)

- End-user
- User organisations**
- Service providers**
- (AAL)Developers**
- Insurance companies
- Policy makers
- Other(s):

4. Specific response to AALuis project (stakeholders, perception, business model)

- a) Developers are interested in the development, people are questioning the costs for participation on the AALuis layer and who will be the managing organisation.
- b) Service providers understand the vision and goal of AALuis but have doubts regarding the practical feasibility (is it possible AALuis will work as presented or is it more of an ideal world)
- c) AALbert is received good and liked by service providers, since the use of screen to screen in The Netherlands is growing Service providers understand

5. Other (valuable) comments

Regarding AALuis and the presentation to 'unknowns' it is difficult to explain/pitch AALuis in two minutes on such a tradefair. Demosets are crucial to deliver the message to all stakeholders (especially service providers).

4.5 AALuis Dissemination Evaluation Form – Altenpflege 2013

Activity name	Altenpflege (Booth & Flyers)
Partner(s) involved*	Verklizan
Date*	9 ^h - 11 th of April, 2013
Location*/**	Nürnberg
Country*/**	Netherlands

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- Trade fair**
- Seminar/Congress
- Webinar
- Newsletter
- Workshop
- Demonstration
- Other:.....

2. Description of dissemination activity

- g) Desk with AALuis presentation and flyer
- h) Discussing the added value of the AALuis layer to stakeholders

3. Stakeholders involved (multiple answers possible)

- End-user
- User organisations**
- Service providers**
- (AAL)Developers**
- Insurance companies
- Policy makers
- Other(s):

4. Specific response to AALuis project (stakeholders, perception, business model)

AALuis was presented as part of our roadmap for the extended use of multiple UI's, this was perceived good by UMO customers, partners and other stakeholders.

5. Other (valuable) comments

None

4.6 AALuis Dissemination Evaluation Form –Workshop S&I

Activity name	Consultation workshop on standards and interoperability
Partner(s) involved*	Christopher Mayer / AIT, Martin Petzold / PRO
Date*	15.03.2013
Location*/**	AAL Association office, Brussels
Country*/**	Belgium

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- Trade fair
- Seminar/Congress
- Webinar
- Newsletter
- Workshop**
- Demonstration
- Other:.....

2. Description of dissemination activity

A workshop about needed support actions on standards and interoperability with invited experts and projects.

3. Stakeholders involved (multiple answers possible)

- End-user
- User organisations**
- Service providers**
- (AAL)Developers**
- Insurance companies
- Policy makers**
- Other(s): **Scientific**

4. Specific response to AALuis project (stakeholders, perception, business model)

AALuis approach really briefly presented, but standardized UI integration is of importance as well.

.....

5. Other (valuable) comments

Was a first start for an information exchange with the project GUIDE (extended approach to universAAL by Fraunhofer IGD). Will be extended in the planned workshop with Cloud4ALL, universAAL and AALuis in Stuttgart.

4.7 AALuis Dissemination Evaluation Form – Open Day universAAL

Activity name	universAAL Open Day
Partner(s) involved*	Miroslav Sili, Christopher Mayer / AIT
Date*	11.04.2013
Location*/**	Vienna
Country*/**	Austria

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- Trade fair
- Seminar/Congress
- Webinar
- Newsletter
- Workshop**
- Demonstration
- Other:.....

2. Description of dissemination activity

In conjunction with the universAAL plenary meeting in Vienna (Austria), an open day/workshop where interested parties are welcome to learn more about universAAL, meet the project partners and propose and discuss possible ways of cooperating with the project was hosted.

3. Stakeholders involved (multiple answers possible)

- End-user
- User organisations
- Service providers
- (AAL)Developers**
- Insurance companies
- Policy makers
- Other(s): **Scientific**

4. Specific response to AALuis project (stakeholders, perception, business model)

An interesting discussion about AALuis and other UI approaches after a presentation by Christophe Strobbe (Stuttgart Media University, Germany) about Cloud4All started.

5. Other (valuable) comments

A follow-up will be a practical workshop with participants from Cloud4All, universAAL and AALuis in the beginning of July (Stuttgart). Miro and Christopher will participate. The focus will be on the different approaches and how to apply them (hands-on).

4.8 AALuis Dissemination Evaluation Form – AAL Symposium 2013

Activity name	2. AAL-Symposium - Ein Symposium zur Fortschreibung der ersten deutschen Normungs-Roadmap AAL
Partner(s) involved*	Christopher Mayer / AIT
Date*	17.04.2013
Location*/**	Frankfurt
Country*/**	Germany

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- Trade fair
- Seminar/Congress
- Webinar
- Newsletter
- Workshop**
- Demonstration
- Other:.....

2. Description of dissemination activity

Participation in the workshop about the update of the German AAL standardization roadmap.

3. Stakeholders involved (multiple answers possible)

- End-user
- User organisations**
- Service providers**
- (AAL)Developers**
- Insurance companies
- Policy makers**
- Other(s): **Scientific**

4. Specific response to AALuis project (stakeholders, perception, business model)

An interesting discussion about Cloud4All, AALuis and possible collaboration possibilities with Gottfried Zimmermann (Stuttgart Media University, Germany).

5. Other (valuable) comments

A follow-up will be a practical workshop with participants from Cloud4All, universAAL and AALuis in the beginning of July (Stuttgart). The focus will be on the different approaches and how to apply them (hands-on).

Another follow-up will be the side-event "Workshop on User Interaction in Ambient Assisted Living" at the AAL Forum 2013. It will cover short presentations of selected research projects (including AALuis) related to user interaction in AAL. Furthermore, intermediate results from a research project developing a taxonomy are presented and discussed. Finally, a structures discussion about further research directions is planned. For further information see <http://www.aaluiworkshop.netpages.de/>.

4.9 AALuis Dissemination Evaluation Form – Lecture Vienna Tech 2013

Activity name	Lecture at Vienna University of Technology 2013
Partner(s) involved*	Miroslav Sili, Martin Morandell, Christopher Mayer / AIT
Date*	03-06.2013
Location*/**	Vienna University of Technology, Vienna
Country*/**	Austria

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- Trade fair
- Seminar/Congress
- Webinar
- Newsletter
- Workshop
- Demonstration
- Other: **Lecture**.....

2. Description of dissemination activity

The presentations of AALuis were given as part of the course “Modelling for Ambient Assisted Living (AAL)”. The ideas of AALuis and the user involvement were presented in detail. A hands-on introduction to the concept of services, CTT and integration in AALuis was given

3. Stakeholders involved (multiple answers possible)

- End-user
- User organisations
- Service providers
- (AAL)Developers
- Insurance companies
- Policy makers
- Other(s): **Scientific (students)**

4. Specific response to AALuis project (stakeholders, perception, business model)

Methods of user involvement were really liked. The overall idea of AALuis was appreciated as well and the students liked the idea of exploring the solution directly. This will be easier in the upcoming year.

5. Other (valuable) comments

We have seen that the AALuis layer is in a prototype stage now and not yet easy to distribute, thus the hands-on session was restricted to building CTTs and the service integration was presented by AIT.

4.10 AALuis Dissemination Evaluation Form – NordiCHI 2012

Activity name	How to design touch interfaces for and with older adults. Workshop at ACM NordiCHI (Nordic Conference on Human-Computer Interaction)
Partner(s) involved*	CURE
Date*	14 October 2012
Location*/**	Copenhagen
Country*/**	Denmark

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- Trade fair
- Seminar/Congress
- Webinar
- Newsletter
- X Workshop
- Demonstration
- Other:.....

2. Description of dissemination activity

Presenting the results of the requirements analysis and discussing Persona approach of AALuis with workshop participants

3. Stakeholders involved (multiple answers possible)

- End-user
- User organisations
- Service providers
- (AAL)Developers
- Insurance companies
- Policy makers
- X Other(s): Research community

4. Specific response to AALuis project (stakeholders, perception, business model)

Personas approach created polarised opinions: some participants liked the idea of extending personas and were interested as design guidelines for all older adults are too general. One participant did not like Personas and therefore also refused the extension idea. In general, it is said that the realisation will be very challenging and difficult.

5. Other (valuable) comments

.....

4.11 AALuis Dissemination Evaluation Form – AAL Forum 2012

Activity name	AAL Forum Styria
Partner(s) involved*	CURE
Date*	16 October 2012
Location*/**	Graz
Country*/**	Austria

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- Trade fair
- Seminar/Congress
- Webinar
- Newsletter
- Workshop
- Demonstration
- Other:.....

2. Description of dissemination activity

Distribution of flyers and answering questions.

3. Stakeholders involved (multiple answers possible)

- End-user
- User organisations
- Service providers
- (AAL)Developers
- Insurance companies
- Policy makers
- Other(s):

4. Specific response to AALuis project (stakeholders, perception, business model)

The idea was liked by the majority of respondents.

4.12 AALuis Dissemination Evaluation Form – UI Workshop 2013

Activity name	Workshop on user interface development
Partner(s) involved*	Miroslav Sili, Christopher Mayer / AIT
Date*	01-02.07.2013
Location*/**	Stuttgart
Country*/**	Germany

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- Trade fair
- Seminar/Congress
- Webinar
- Newsletter
- Workshop**
- Demonstration
- Other:.....

2. Description of dissemination activity

A workshop to see how universAAL, GPII/Cloud4all and AALuis can benefit from each other and to define first action points to do so and to identify resources (tools, technologies, ...) that could be reused in other projects.

3. Stakeholders involved (multiple answers possible)

- End-user
- User organisations
- Service providers
- (AAL)Developers**
- Insurance companies
- Policy makers
- Other(s): **Scientific**

4. Specific response to AALuis project (stakeholders, perception, business model)

The workshop was an open exchange between the projects for identifying possible contact points and to define possible action points for collaborations. Some important issues have been discussed:

- Possible re-use of and contribution to the GPII user preference model by AALuis
- Survey on service providers and their acceptance of task models?
- Build a design tool that semi-automatically derives a task model from a more concrete user interface

5. Other (valuable) comments

First follow-ups will be a joint publication about the workshop results (main author: Christopher, contributors: workshop participants). Further future actions are a contribution to the GPII standardization activities regarding user preferences and to check possible project ideas.

4.13 AALuis Dissemination Evaluation Form – Innovation Day 2013

Activity name	Verklizan Innovation Day 2013
Partner(s) involved*	Verklizan, ProSyst
Date*	25-11-2013
Location*/**	Essen
Country*/**	Germany

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- Trade fair
- Seminar/Congress**
- Webinar
- Newsletter
- Workshop
- Demonstration
- Other:.....

2. Description of dissemination activity

Booth on exhibition area with AALuis demoboard.

3. Stakeholders involved (multiple answers possible)

- End-user
- User organisations**
- Service providers**
- (AAL)Developers**
- Insurance companies
- Policy makers
- Other(s):

4. Specific response to AALuis project (stakeholders, perception, business model)

With the use of the demo board it was very easy to present AALuis and our vision to the participants. Participants liked the combination of home automation and care services. The flexibility to use one services on various UI's was new to most participants and they could see this could improve the adoption of such services for the end users.

5. Other (valuable) comments

A suggestion was that a cooperation with Telco's or ISP's could be interesting for this concept.

4.14 AALuis Dissemination Evaluation Form – AAL Forum 2014

Activity name	AAL Forum Bucharest
Partner(s) involved*	AIT, CURE
Date*	09 September 2014 – 12 September 2014
Location*/**	Bucharest
Country*/**	Romania

* If the event is already planned in the EventsPlan spreadsheet on SharePoint, mentioning the name is enough.

** If applicable

1. Dissemination activity

- Trade fair
- Seminar/Congress
- Webinar
- Newsletter
- workshop
- Demonstration
- Other:.....

2. Description of dissemination activity

Detail presentation of the AALuis layer, life integration of an example services into the layer and discussion with participants of the side event at the AAL Forum with the title “An Introduction to the AALuis Approach for the Automatic Generation of User Interfaces”.

Presentation and live demonstration of the AALuis layer during the whole conference at the AIT booth.

Distribution of flyers and answering project specific questions.

3. Stakeholders involved (multiple answers possible)

- End-user
- User organisations
- Service providers
- (AAL)Developers
- Insurance companies
- Policy makers
- Other(s): Other research organisations working in the AAL and or HCI domain like Universities and SMEs involved in research work.

4. Specific response to AALuis project (stakeholders, perception, business model)

The idea of adaptive user interfaces and the possibility of a seamless interaction were very liked by the side event participants and the booth visitors. The question about the availability of the layer was raised couple of times and some people also asked for a download link. The general impression was that the layer has the potential to become a successful product but it also needs to be improved.
