

# Confidence

Remaining mobile and active as long as possible despite dementia

## Systematic solution

- Addressing the needs of people with dementia, their formal and informal carers
- Combining personal help with information and communication technologies
- Involving volunteers to relieve family carers
- Combining navigation, weather information, emergency, daily schedule, reminder and assistance functions in one service bundle
- Providing suitable and easily adaptable user interfaces (developed together with end users)
- Being tested in 3 European countries (Austria, Romania and Switzerland)
