AAL-2013-6-026

1. EXECUTIVE SUMMARY

Deliverable 4.3, the User Manual, has been developed in order to provide basic information about the features of the platform for the users. Although, the platform will be easy to use and does not require extensive training before getting started, the document covers the topics of becoming a mentor or a mentee, and a description of the basic mentoring tools. Therefore, it was handed the study participants in order to support them during the course of the study. In the final interviews, most of them reported that they found it both helpful and purposeful.

The manual has been developed in four different languages, i.e., English, German, Romanian, and Dutch. In this document, we provide the PDF of the English version.

2. USER MANUAL (ENGLISH VERSION)

Professional Intergenerational Cooperation and Mentoring

ProMe seeks to provide meaningful opportunities for occupation in the life of older adults, in the transition from work to retirement and beyond. It allows professional intergenerational cooperation and mentoring via an online service platform, bringing together older adults with younger generations, based on theoretical concepts for mentoring.

The Role of a Mentor

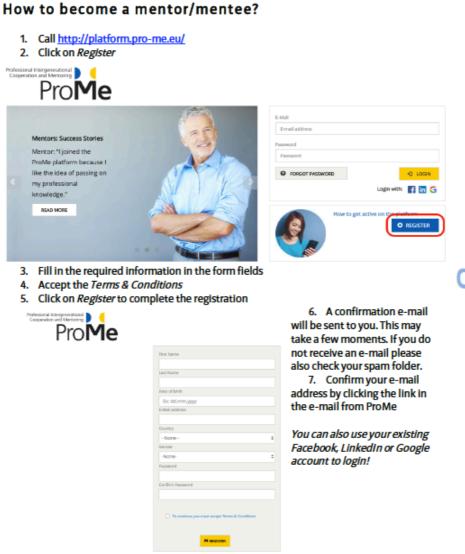

The role of the mentor is suitable for everyone The role of the mentee is suitable for everyone who is willing to share her/his professional knowledge and/or personal experience. The ProMe platform will support you in being a mentor from scratch. Therefor, it is not necessary to have any previous experiences or knowledge regarding mentoring. The platform provides the right tools at the right time, exactly when you need them in the mentoring process. Being a mentor means that you get involved in a collaborative relationship that is based on liability and trust. As a mentor you define together with your mentee what the framing conditions of this relationship will be, for example, how much time you want to invest in which particular time period.

The Role of a Mentee

who is seeking support by an experienced person that is willing to share her/his professional knowledge and/or personal experience. The matching system on the ProMe platform helps you to find a mentor accordingly to your needs and expectations and will provide you with a variety of collaboration tools that support you in effectively working together. Being a mentee means that you get involved in a collaborative relationship that is based on liability and trust. As a mentee you define together with your mentor the framing conditions of this relationship, for example, how much time you want to invest. Legal issues like, for example, intellectual property rights, will be secured by the ProMe platform through its terms of use.
